

M3010 WEIGHT CALIBRATION KIT

- Compact and portable weight calibration kit.
- Compatible with *Grace Instrument M3600 Rheometer* and *M3400 Manual Dial-Reading Viscometer*.
- Includes red thread, spool assembly, calibration bead, weight measurement, carrying case, and instructional guide.

PRODUCT DESCRIPTION

Compact, Portable, and Convenient Calibration Kit

The *Grace Instrument M3010 Weight Calibration Kit* works in conjunction with the *Grace Instrument M3600 Rheometer* and *M3400 Manual Dial-Reading Viscometer*.

Calibration is a method used to determine and maintain the accuracy of a machine's measurements. It is recommended that the instrument be calibrated as often as necessary, depending on frequency of use.

This convenient kit includes red thread, a spool assembly, calibration bead, weight measurement, carrying case, and instructional guide. Instructional guide details the steps required to perform a weight calibration.
