

Cement Mold

The MACH7450AS3 Cement Mold can form eight two-inch (5.08 cm.) long cubes for compressive strength tests. This mold can be used in any of the HPHT Cement Curing Chambers Grace Instrument offers. A longer mold is available that holds sixteen cubes, which is compatible with the M7451 and the M7455 – the deepest HPHT Cement Curing Chambers we offer. Our Cement Molds can also be used in non-Grace Instrument curing chambers.

Specifications

Cube capacity: 8 (a longer 16-cube mold that is compatible with the M7451 and M7455 curing chambers is also available)

Cube length: 2 inches (5.08 cm.)

Compatible Grace Instrument curing chambers: M7450, M7451, M7454, M7455

Material: brass and stainless steel
